Introduction

Unemployment is one of the major economic challenges affecting income, poverty, and economic development.

This project analyzes unemployment trends in Pakistan and studies its economic impacts.

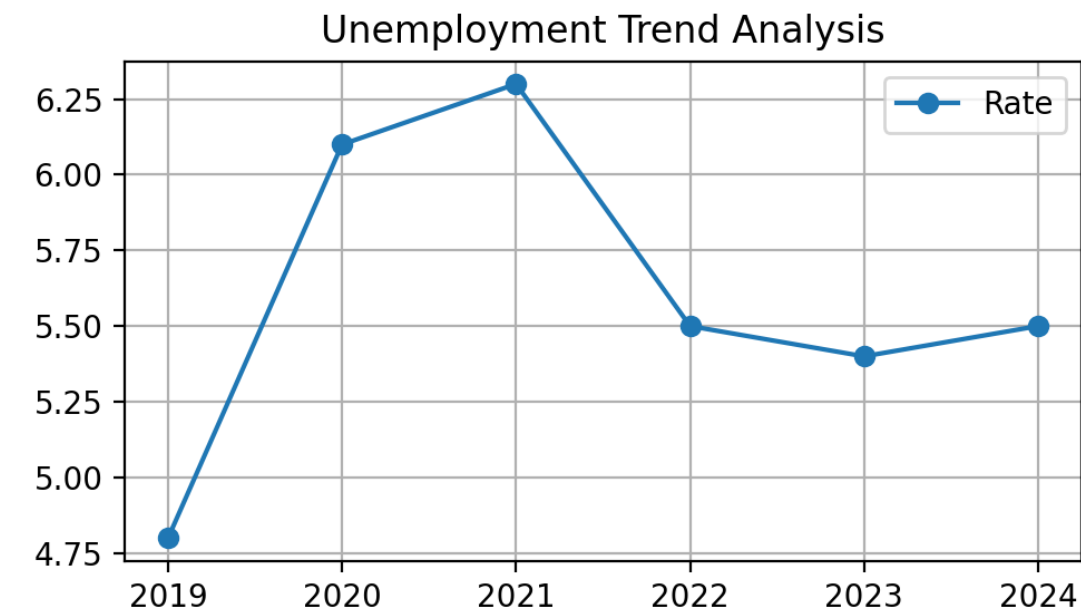

Objectives

- To analyze unemployment patterns.
- To understand causes of unemployment.
- To study its impact on economic growth.

Data Table

Year	Rate
2019	4.8
2020	6.1
2021	6.3
2022	5.5
2023	5.4
2024	5.5

Graph

Simple Diagram

Education + Skills + Investment → Employment → Economic Growth

Analysis

Increase During 2020-2021

Reasons:

COVID-19 economic slowdown

Business closures

Reduced employment opportunities

Recovery Period

Employment improved because:

Economic activities restarted.

Businesses reopened.

Demand increased.

Economic Impact of Unemployment

High unemployment causes:

- Lower household income
- Reduced consumption
- Increased poverty
- Lower economic growth

Findings

Economic conditions strongly influence employment.

Skill development can reduce unemployment.

Investment creates job opportunities.

Conclusion

Unemployment increased during COVID-19 and later stabilized.
